The State's Procedures and
Information Positions
May 2008
Report No. 08-706

John Keel, CPA State Auditor

# A Classification Compliance Review Report on the State's Procedures and Information Positions 

## Overall Conclusion

The State Auditor's Office's State Classification Team reviewed 562 procedures and information positions and other positions performing similar work at 45 agencies and found that 462 (82 percent) of these positions were classified correctly. Agencies took appropriate action to resolve misclassified positions and reported that they will spend $\$ 94,761$ annually to properly classify these positions.

The specific information and procedures positions covered in this review included audio/ visual technicians, governmental relations specialists, information specialists, management analysts, marketing specialists, and technical writers.

## Key Points

Eighty-two percent of procedures and information positions were classified correctly.

Of the 562 procedures and information positions reviewed, 462 ( 82 percent) were classified correctly. Of the 100 employees in positions that were misclassified, the majority ( 78 percent) were a result of agencies' classifying positions in an incorrect classification series (for example, an employee classified as an information specialist instead of as a graphic designer).

## Agencies will spend $\$ 94,761$ annually to properly classify positions.

Collectively, agencies will spend $\$ 94,761$ annually to properly classify positions that were misclassified. In many cases, the agencies were able to reclassify positions without changing the salaries. Twenty-seven positions were given salary increases ranging from $\$ 590$ to $\$ 7,775$ annually.

## Proper classification of positions ensures efficient and effective use of resources.

Misclassified positions can pose a business risk to agencies through their effect on services and budgets. If employees are classified in positions that are at too high

[^0]of a level for the work they perform, agencies may be paying employees more than their job duties warrant. If employees are classified in positions that are at too low of a level for the work they perform, employees could be underpaid. This could affect the employees' morale and lower their motivation, thus affecting services to the citizens of Texas. In addition, it could result in higher turnover, which could be costly for the agencies.

## Summary of Objective, Scope, and Methodology

The objective of this classification compliance review was to determine whether agencies conform to the Position Classification Plan by ensuring proper classification of positions.

The scope of this review included employees classified within the audio/ visual technician, governmental relations specialist, information specialist, management analyst, marketing specialist, and technical writer job classification series, as well as other positions identified as performing similar work but classified in other job classification series.

The State Classification Team uses the classification method of job evaluation when reviewing positions and determining proper classifications. These determinations are primarily based on the comparison of duties and responsibilities being performed with the state job description for each position.

This project was a review; therefore, the information in this report was not subjected to all the tests and confirmations that would be performed in an audit. However, the information in this report was subject to certain quality control procedures to ensure accuracy and compliance with generally accepted compensation practices.

## Detailed Results

Of the 562 procedures and information positions reviewed, 462 positions ( 82 percent) were classified correctly. The positions reviewed included audio/visual technicians, governmental relations specialists, information specialists, management analysts, marketing specialists, and technical writers. The State Auditor's Office's State Classification Team also reviewed positions that agencies identified as performing similar work but that were classified in other job classification series (see Table 1).

| Positions Reviewed |  |  |
| :--- | :---: | :---: |
| Job Classification <br> Series | Number of <br> Employee <br> Positions <br> Reviewed | Number of <br> Employee <br> Positions <br> Misclassified |
| Audio/ Visual Technician | 18 | 0 |
| Governmental Relations <br> Specialist | 29 | 2 |
| Information Specialist | 400 | 61 |
| Management Analyst | 15 | 4 |
| Marketing Specialist | 33 | 1 |
| Technical Writer | 29 | 3 |
| Other Classification Titles | 38 | 29 |
| Totals | 562 | 100 |

See Appendix 2 for a list of the 45 agencies where these positions were reviewed.

## Chapter 1-A

## Classification

Most agencies appropriately classified their procedures and information positions. Of the 562 procedures and information positions reviewed, 462 (82 percent) were classified correctly.

## Definitions

Job Classification - An individual job within a job classification series. Each job classification has a corresponding salary group assignment appropriate for the type and level of work being performed.
J ob Classification Series - A hierarchical structure of jobs arranged into job classification titles involving work of the same nature but requiring different levels of responsibility.
Salary Group - A specified level within a salary schedule made up of a salary range with a minimum and maximum salary rate. Assignment of salary groups is based on the type and level of work being performed.
Salary Range - The range of pay rates, from minimum to maximum, set for a salary group or job classification.
Reclassification - The act of changing a position from one job classification to another job classification that better reflects the level or type of work being performed.

To address the 100 employee positions that were misclassified, agencies chose to:

- Reclassify 78 positions (78 percent) into a different job classification series (see Appendix 3, Table 3).
- Reclassify 15 positions ( 15 percent) within the same job classification series but at a higher salary group (see Appendix 3, Table 4).
- Reclassify 2 positions (2 percent) within the same job classification series but at a lower salary group. The reclassifications, however, did not result in salary decreases (see Appendix 3, Table 5).
- Change the job duties of 5 positions ( 5 percent) so they could remain in their current job classification titles and be properly classified (see Appendix 3, Table 6).

Collectively, agencies will spend $\$ 94,761$ annually to properly classify positions that were misclassified. In many cases, the agencies were able to reclassify positions without changing the salaries. Twenty-seven positions were given salary increases ranging from $\$ 590$ to $\$ 7,775$ annually.

## Chapter 1-B

Importance of Proper Employee Classification
The proper classification of positions ensures efficient and effective use of resources. Misclassified positions can pose a business risk to agencies through their effect on services and budgets. If employees are classified in positions that are at too high of a level for the work they perform, agencies may be paying the employees more than their job duties warrant. If employees are classified in positions that are at too low of a level for the work they perform, employees could be underpaid. This could affect the employees' morale and lower their motivation, thus affecting services to the citizens of Texas. In addition, it could result in higher turnover, which could be costly for the agencies.

## Appendices

## Objective, Scope, and Methodology

## Objective

The objective of this classification compliance review was to determine whether agencies are conforming to the Position Classification Plan by ensuring proper classification of positions.

## Scope

The scope of this review included employees classified within the audio/visual technician, governmental relations specialist, information specialist, management analyst, marketing specialist, and technical writer job classification series, as well as other positions identified as performing similar work but classified in other job classification series at state agencies.

## Methodology

In determining whether positions were appropriately classified, the State Classification Team reviewed the following:

- State job descriptions.
- Surveys completed by employees and verified by their supervisors.
- Internal salary relationships.

The State Classification Team uses the classification method of job evaluation when reviewing positions and determining proper classifications. These classification determinations are primarily based on the comparison of duties and responsibilities being performed with the state job description for each position.

When determining proper classification, the State Classification Team does not focus on specific differences between one level and the next in a job classification series (for example, an Information Specialist I position compared with an Information Specialist II position). Instead, the team considers whether an employee is appropriately classified within broad responsibility levels, such as staff information specialists (Information Specialist I and Information Specialist II positions) or senior information specialists (Information Specialist III, Information Specialist IV, and Information Specialist V positions).

The State Classification Team has an automated job evaluation process. A database was populated with information regarding the employees whose
positions were being reviewed. Staff members in the agencies' human resources departments verified the information in the database to ensure that all positions were included. Employees were then asked to complete online surveys describing the work they perform and the percentage of time they spend performing their duties. Supervisors were asked to review and verify employees’ survey responses.

After the State Classification Team's review and analysis, an initial determination of whether the positions were appropriately classified was made. Agencies were given the opportunity to review and address potential misclassifications.

To address each potential misclassification, agencies could reclassify an employee to a job classification title consistent with the work performed, change an employee's duties to conform to the assigned job classification title, or provide justification to explain why an employee was appropriately classified.

The State Classification Team made follow-up calls to determine and validate proper classification of positions and to gather additional information to resolve discrepancies.

## Project Information

This review was conducted under the requirements of Texas Government Code, Section 654.036 (3). This project was a review; therefore, the information in this report was not subjected to all the tests and confirmations that would be performed in an audit. However, the information in this report was subject to certain quality control procedures to ensure accuracy and compliance with generally accepted compensation practices.

The following employees of the State Auditor's staff prepared this report:

- Juliette Torres, CCP, PHR (Project Manager)
- Sharon Schneider, PHR
- J. Scott Killingsworth, CIA, CGFM, CGAP (Quality Control Reviewer)
- Lisa R. Collier, CPA (Audit Manager)

## Appendix 2

## Positions Reviewed

Table 2 presents a summary of the 562 procedures and information positions reviewed at 45 agencies. The table includes a summary of employee positions reviewed at each agency by job classification series, as well as the number of positions that were misclassified. The "Other Classification Titles" column includes positions that agencies identified as performing similar work but that were classified in other job classification series (for example, program specialists, managers, or directors).

A Classification Compliance Review Report on
The State's Procedures and Information Positions SAO Report No. 08-706

Tables 3 through 6 identify by agency the employee positions that were misclassified and how the agency addressed the misclassifications. To address misclassifications, agencies chose to:

- Reclassify 78 positions into a different job classification series (see Table 3).
- Reclassify 15 positions within the same job classifications series but at a higher salary group (see Table 4).
- Reclassify 2 positions within the same job classification series but at a lower salary group (see Table 5).
- Change the job duties of 5 positions so they could remain in their current job classification titles and be properly classified (see Table 6).

To protect the confidentiality of the employees whose positions were misclassified, each employee was assigned an employee number.

Table 3 shows the 78 employee positions that agencies reclassified into a different job classification series. Reclassification is a change in the classification of a position based on actual duties performed. It does not refer to a change in an employee's duty assignment.
